Delilah Manure Spreader 4000 Series

Delilah Vertical Beater manure Spreaders

The 4000 series models are constructed with 6mm floor panels and 4mm side panel. The floor is hydraulically driven with two chains and a single floor slat. 16mm floor chains are used up to and including D4120 with 65mm rear floor shaft. 20mm floor chains and larger slats on the D4130 & D4150 machines with 80mm rear floor shaft. The body is 1550mm wide with a flared top to create a wider top area for easy loading and less spillage. Rotors are 890mm diameter on the D4120 and below 1100mm diameter on the D4130 and above. With large diameter rotors and a high tip speed the Delilah 4000 series spreaders offer wide spreading width and excellent shredding on a wide range of manures, composts, and sludges.
