Easy-Load Livestock Transporter

A range of drop bed livestock transporters for all types of farm animals.

The Easy-Load Livestock Transporter is designed so that the bed of the trailer lowers down to the ground by pivoting the axle. Using the tractor hydraulics, the axle is returned to the transport position and locked in place for transport. All steel construction with chequer plate floor, steel sides with railed upper sections, internal dividers, and canvas roof cover. Size options available for cattle and pig transport.

Optional Equipment:

- Extra dividing gates
- Herding gate hangers
- Near side loading/personnel door
- Flashing beacon
